Proposition 21: Vehicle License Fee for State Parks

The way it is now:

California has 278 state parks, including state beaches and historic parks. The current \$400 million budget is insufficient to maintain these parks, and 150 parks will be shut down at least part-time. Most parks charge \$12 per vehicle for admission.

What Prop 21 would do:

Proposes to charge car owners an extra \$18 on their annual registration bill, to go into the state park fund. Cars that pay the charge would have free park admission.

Analysis:

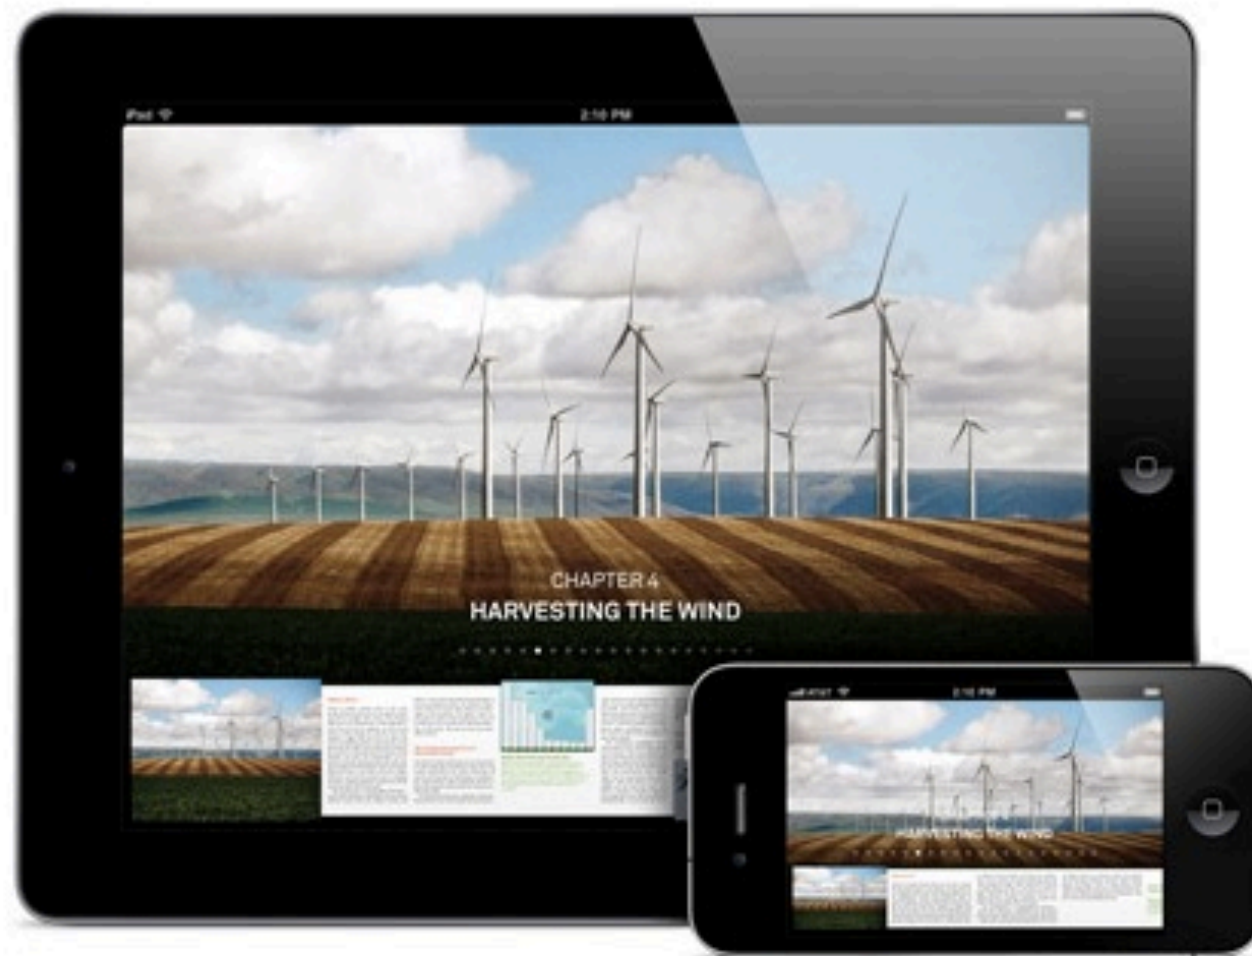

Suppose that an extra \$18 was charged to 100% of California taxpayers. Park admission would be free for those who paid the charge.

This would collect an extra \$174 million (\$246 million from the tax, minus \$72 million lost revenue from admission) for a total state park budget of \$574 million. This is not sufficient to maintain the parks, and 19 parks would be shut down at least part-time.

Park attendance would rise by 35%, to 101 million visits each year.

Authoring

An open book is shown from a top-down perspective, lying flat on a white surface. The pages are a light cream color. On the left side of the book, several pages are folded upwards and outwards, creating a fan-like or flower-like shape. The text "physical metaphors, such as" is written in a black, sans-serif font across the upper right portion of the book's pages.
